

Mohammed Mudassir

Ridderkerk, Netherlands.

T: +31 0624 835 475

E: hello@mudasir.me

About me

1. Imagination and making a vision is my strength.
2. Interested in building products rather than projects.
3. I like to architect software and focus on high-level infrastructure design.
4. Personally, focus on finding the simplest solution, writing less code, and doing more.
5. Designing products using Laravel with Domain-Driven Design.
6. Orchestrating infrastructure with Kubernetes.

Currently working on

1. In my free time, I contribute to open-source projects such as Laravel, Symfony, Passport, Invoice Ninja, and many more.
2. I also work on open-source projects such as Selenium for Laravel, Neptune, and Elastic Email library, etc.

Origin

Nationality	Indian
Date of Birth	19 th January 1992
Religion	Islam
Language Known	English, Hindi, and Urdu

Experience **Fortel Network** (Software Architect) Nov 2018 - Jan 2021

Fortel has a dating platform, where we work in Agile with a one-week sprint. I'm responsible for the execution, delivery, and deploying code to production.

My key role is in managing the Team and infrastructure on AWS and Digital Ocean with multiple clusters running independently. We moved to Kubernetes (KOPS) on AWS and successfully migrated the existing project. Apart from Infrastructure, my responsibility is also to revamping existing projects to support new infrastructure.

1. Rebuilt the entire Retention System using Domain Driven Design's methodology.
2. Test-Driven Development became a standard to follow.
3. Implemented Behat for the task which requires Integration testing.
4. Redesign the deployment process by building custom docker images that are specific to project needs.

Key Skills: Kubernetes, KOPS, Docker, TDD, DDD, Laravel, VueJS, NuxtJS, and Tailwind.

Insider. (Sr. PHP Developer) [Full stack developer] Nov 2017 – Aug 2018

Insider is a growth management platform for clients such as Toyota, Singapore Airlines, Macdonald and many more. My responsibility is to deliver awesome code and I specifically focus to find ways that can improve the team by reducing bugs and improving efficiency.

1. Introduced Test-Driven Development and successfully implemented it.
2. Implemented a Single Page application in one of the products.
3. Achieved to convince most of the team members about Domain-Driven Design and took a session on how DDD will bring value to the product architecture.
4. Successfully transformed one of our frontends from Gulp to Webpack.
5. Proposed RESTful API implementation.

Key Skills: PHP7.1, Laravel, ECMA6, VueJS, SCSS, Lambda, other AWS services, Python, Docker, etc.

Nestopia (Software Architect)

Jan 2017 – July 2017

A kind of an ISO certification in the Interior Designing Industry where my job is to design the flow of new features using the right technology to fit the desired need.

1. Responsible person to design “Match Making” tool to find the best designer available for a suitable home.
2. Implemented best practices standards and standardize code architecture.
3. Maintain portal, bug fixes, and release upcoming changes.

Key Skills: Laravel, VueJS, ECMA6, Webpack, jQuery, Docker, and AWS, etc.

Note: Project sustain for more than 4 years and made an impact in the market but due to insufficient funding. Nestopia became stagnant and closed for further development.

Synergy Technology Services (Sr. Software Engineer) Dec 2015 – Jan 2017

Contributed to The Orchard, Visa Surgeon, Society Management System, RoomsDot, Resume Analyzer, Ambrosia India, MSRTC (Indian government project), and many more. Also, I trained to get people more familiar with Laravel and new features in PHP.

1. The Orchard: Sony is the parent company of The Orchard. The Orchard delivers music, videos, and albums across the globe. I contributed to making their backend smooth and easy to use.
2. Visa surgeon: An online portal to get assistance in getting a visa from any country. My contribution was to build and maintain a chat feature and role management system which is developed on socket.io and Laravel.
3. Society Management System: Consist of billing, flat maintenance, interest calculation on last month unpaid bill, reminders, notification, meetings, events, storing documents, and much more features were built. This project is developed on Laravel, AngularJS, ECMA6, and many open-source projects.

Key skills: Laravel, Zend Framework, JQuery, AngularJS, Flask framework, Unit Test, Laravel, ECMA6, socket.io, NodeJS, and many more.

PostBox Communications (Team Lead)

Jan 2014 - Dec 2015

My responsibility was to direct people in the right direction, select the best technology which will fit the needs of the project, and encourage the team to learn the new technology which will help the company and them to grow.

1. Drupal: invenio-ets.com, growthconceptmanagement.com.au which is purely based on Drupal and custom JS.
2. Laravel: Work Management system, Attractions, Wandermonkey.com, etc are developed on Laravel.
3. CodeIgniter: Papulex Facebook app was developed on CodeIgniter. The main purpose of this app is data gathering.
4. Others: Emdico powered by a custom framework, Singhanian, and a few more portals and websites were developed as per client requirement.

Key Skills: Drupal, Laravel 4, Laravel 5, Custom PHP framework, HTML5, CSS3, jQuery, Angular, Single Page Application, Symfony, and many more.

Redcom (Drupal Developer)

July 2014 – Dec 2015

Projects contributed to thealumniportal.com, thealumniportal.net, ves.ac.in, gep.com, etc are built on Drupal 6 and Drupal 7.

Key skills: Building Drupal Modules, Drupal, PHP5, HTML5, CSS3, and Javascript

OurDoctor (Freelancer)

March 2012 - 2015

Portal was designed to facilitate people who suffer from common diseases and what necessary medicine should be taken will be decided by the system. The

permutation combination and algorithm design by me to get the proper result. The medicine gets confirmed by the available doctor and then prescribed to the patient.

Key skills: Codeigniter, PHP5, Javascript, jQuery, HTML5 and CSS3.

Wisuca (Freelancer)

Mid 2011

I was responsible for maintaining and designing their portal from scratch. Later due to extensive features. It became a business-specific CMS.

Key skills: PHP5, Javascript, jQuery, HTML5 and CSS3.

Other Skills Domain-General: Self-motivated, Working on leadership quality, time management, strategy planning. Domain-Specific: Code organization, Optimum utilization of resources.

Education S.T. Elias, Rizvi College, Lynda University, Laracasts, w3schools.com, Talent Edge.

Course	School	University	Year	Percent
Laracasts	laracasts.com	-	Present	No Exam
EggHead, Udemy	egghead.io, Udemy	-	Present	No Exam
HTML, CSS	w3schools.com	W3 Certification	2011	98%
PHP, MySQL	lynda.com	Lynda University	2011	No Exam
Excel in IT	Talent Edge	Vendor Certificate	2013	A Grade
B.Com	Rizvi College	Mumbai University	2013	53.60%
HSC	Rizvi College	Maharashtra Board	2009	53.50%

SSC S.T Elias High Maharashtra Board 2007 59.33%

Digital Ocean 12. Open Source Libraries

On the go Jenkins, Continuous Integration Pipeline, GraphQL, Aerospike, Kubernetes, Domain-Driven Design with best practices.

Open Source Contribution These are the few contributions that I made to the open-source community:

1. [Selenium package](#)
2. [Coding principle](#)
3. [Aadhaar validation package](#)
4. [SPA framework](#)
5. [API framework](#)

Other Achievement

1. Among the top 50 PHP and Docker developers in the Netherlands by codersrank.io.
2. Was one of the Best Martial Art students and created a record in getting the highest medals and trophies.

3. Conducted a seminar in which presented the future of a person without extra activities and was the only one who got this chance in College.
4. A letter from Google being the first to use their new service.
